

How to play Three-Card Poker

Three Card Poker is an exciting stud poker game that offers three ways to play and four different ways to win. Players may bet against the dealer or bet on the value of their own three-card hand or bet both. Bonus payouts may be had for certain hands when wagering against the dealer.

Basics of Play

To play against the dealer, the player places an ANTE wager. After looking at his three-card hand, the player may fold, or if he thinks his hand is high enough to beat the dealer, he places an equal wager on the **PLAY spot**. If the player's hand beats the dealer's qualifying hand of a queen or better, he wins both wagers. If the dealer doesn't qualify, the player wins the ANTE wager and the PLAY wager is a push. To play the hand value only and not against the dealer, the player places a wager on the **PAIR PLUS spot**. If his hand contains a pair or better, the player wins. To play both, the player bets the ANTE and PAIR PLUS spots. The player must make a **PLAY wager** if he has placed the ANTE and PAIR PLUS wagers, or he forfeits both.

Ranking of hands from highest to lowest:

Straight Flush, Three-of-a-Kind, Straight, Flush and a Pair. If no hand contains a pair or better, the hand that contains the highest-ranking card(s) wins. Ace is high except in 3-2-Ace sequence.

Payout Schedule For Winning hands

Ante and Play wagers are paid even money.
